

Project Engineer (Structural/Building Envelope)

Joseph B. Callaghan, Inc. – Philadelphia, PA

ABOUT JOSEPH B. CALLAGHAN, INC.

Joseph B. Callaghan, Inc. (JBCI), established in 1967, has been providing professional consulting structural and investigative services in Philadelphia and New Jersey for over fifty years with focus on building envelopes and façade restoration. Primary clients include university campuses, healthcare facilities, and residential property managers. We have experienced continued success and steady growth by ensuring quality service, consistent company leadership, and retention of employees.

JBCI is STABLE: We were founded over 50 years ago with average staff tenure of 18 years.

JBCI is SPECIALIZED: 75% of work involves structural investigation and assessment of existing structures.

JBCI is DIVERSE: 30% of our engineering staff is female. Industry average is 8%.

Our corporate policy is for each employee to be involved in all aspects of a project, from inception to completion. We believe this creates well rounded engineers and gives them the confidence to handle the complexities of our industry. Please visit our website at www.JBCIengineers.com and social media [@jbcieningeers](https://www.instagram.com/jbcieningeers) to explore some current/completed projects and company culture.
